## Cards

Cartadis TC4N cards are credit-card sized featuring the high coercivity magnetic technology. Two types are available: reloadable cards and disposable cards (not reloadable). Both cards are supplied blank and need to be recorded before use on the Cartadis TC4N. A reloadable card can be revalued and reused several times while a disposable card can be loaded only once.

### ***Cards recorded with an account number (account card)***

these cards must be reloadable and first recorded with an account number, a department and copies number may also be included. The Cartadis TC4N memory contains up to 10 000 accounts and 99 departments that can be read by means of a printer or any type of data collection system at any time.

### ***Cards recorded with a number of copies (debit card)***

these cards can be reloadable or disposable and must be first recorded with a number of copies. As phone cards, they are anonymous and dedicated to prepaid copy-selling.

### ***The administration card***

intended for the person in charge of the copier, it enables to both programm cards and access to the Cartadis TC4N functionalities.

## Applications fields

### **Companies**

The increasing competition of companies leads to an accurate control of charges. Copy management by an account card is the solution that enables to store, in the TC4N memory, the number of copies made by each person, section and department in the company.

### **Schools**

Needs are often double:

- copy management by account cards for teachers or staff,
- copy vending by debit cards for students.

### **Copy shops**

- copy vending by debit cards for private people,
- invoicing at the end of month by account cards for companies.

## Compatible units

Cartadis TC11N, cards dispenser/reloader DRC4, cards dispenser CD20, Cartadis printer, Data collection terminal TP1, TCNet software and TC4 network.

## Features

Dimensions: 100 (W) x 90 (H) x 180 (D) mm - Weight: 1 Kg.
